„FX Blue team was extremely helpful, solving us several challenges and delivered professionally tailored solution. The implementation of tools was quick and seamless and we are getting a great feedback from our traders on that.”

Website widgets

Price, depth and live sentiment displays for brokers and their affiliates

Use it as a content for your website and bring more traffic with your live data.

„We have a long-standing relationship with FXBlue and they are a highly valued partner. They are innovative, their products are very reliable and they are one of the most responsive FinTech suppliers we deal with.”

FOREX.com

HTML5 Charting

Market-leading HTML5 financial charting, with full tablet and mobile support

- The charting can be used either as a single widget on a website, for example to illustrate analysts' research notes, or be deployed as a complete charting application with multiple layouts, saved templates and workspaces, pop-out into new browser windows, etc.

The charting includes all of the features expected of professional charting, plus many other refinements such as:

- Momentum scrolling;
- Full handling of touch devices such as tablets and mobiles;
- New chart types such as Baseline;
- Support for event markers and axis levels/bands;
- Many advanced indicators and drawing tools; and
- Support for end-users creating their own technical indicators.

Trading competitions

Empowering brokers to attract, retain, and excite traders through gamified experiences and real-time leaderboards.

Key Features

- Broker branded trading competition system on your servers
- Traders must open an account with you to participate
- Automatic results tracking
- Public or private leaderboards easily integrated into your website through our widget
- Multiple ranking criteria – profit, balance, drawdown, etc.
- Possible marketing options through our retail website
- We collect only account numbers and nicknames (for the leaderboard purposes) – no personal data

Technical Setup

- We manage the competition via the Manager API (with only the 'supervise-trades' option turned on)
- Compatible with MT4 & MT5
- Easy leaderboard integration into your website

Broker Benefits:

- Increased trading volume through competition
- Client retention via gamification and engagement
- Lead generation – use contests as a marketing hook
- Flexible promotions – e.g. “Trader of the Week” campaigns

Leads

Leads are generated through the free app downloads from 120+ countries where our software is used.

Traders opt-in to have their details shared with the sponsor broker. Data provided are fully **GDPR** compliant. You can **target specific regions** for better conversion.

The leads generation process is the following:

1. Leads are generated through our retail website – explicit consent to be contacted
2. They are validated via SMS and email – verified data
3. Leads can be automatically uploaded to your CRM – quick access

Your brand is promoted throughout the registration process and we can reach out to these traders with an introductory e-mail about you before your sales department contact them.

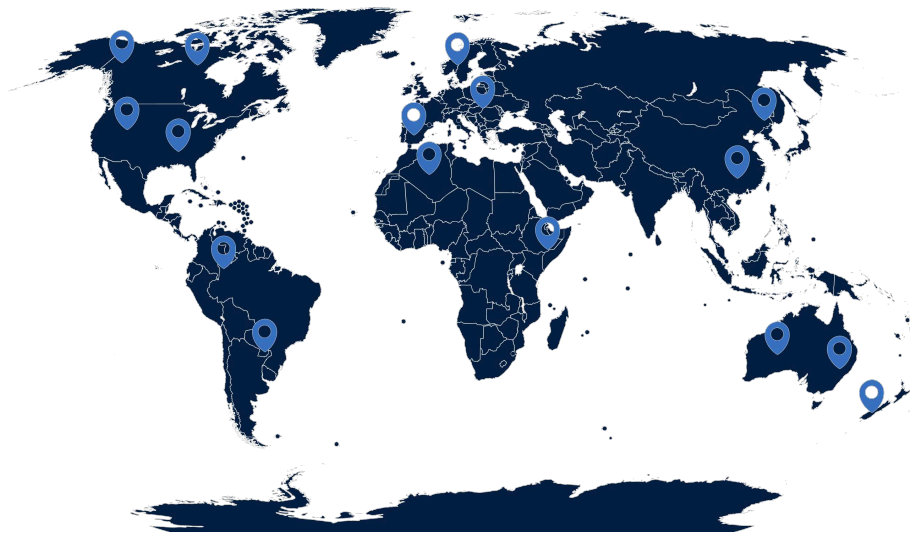

Advertising

Be Seen Where Traders Are.

Ad Packages

Promote your brand across 120+ countries through FX Blue retail site. Choose from flexible packages tailored to your goals – whether you're after reach, leads, or conversions.

- Geo-targeting included

Web Banner Advertising

Your banners. Our traffic. FX Blue offers premium banner placements directly on our high-traffic retail website – placing your brand in front of engaged, active traders.

- 100k+ active users of the website per month
- Integrated with live trading content
- Multiple formats available (desktop & mobile)
- High-visibility placements that drive results
