MY TRADER

BY FXBLUE

www.fxbluelabs.com   sales@fxblue.com

ENGAGE YOUR CLIENTS

Keep your traders active and coming back.

- Highly configurable for specific needs of traders

- Mobile and Desktop version – Fully white-label + iOS & Android

- Creating community through social sharing functions

- Built-in analytics & 35+ advanced tools

WHAT MAKES MYTRADER DIFFERENT?

1 — ### Configurable
Broker and trader can both rearrange and redesign the platform, building their own preferred trading app.

2 — ### Huge Range of Tools
MyTrader contains over 50 amazing widgets including trading tools, market data, calculators, and many more.

3 — ### Multi-asset
MyTrader can be adapted for any asset class including equities and crypto, and can include market depth and client order book.

4 — ### Flexible integration
MyTrader can be integrated with any trading venue which has a web-compatible API

5 — ### Auto Scripting
Traders can automate common actions, creating scripts which place trades or help them navigate and use the platform more easily.

6 — ### Social Sharing
Traders and analysts can download and share content with thousands of other people via email, social media, or the web.

7 — ### Single Customer Journey
The broker can put customer sign-on, KYC, payments, education, webinars, copy-trading, trading insights, statements or any third-party tools inside the web & mobile app to create the optimal trader experience.
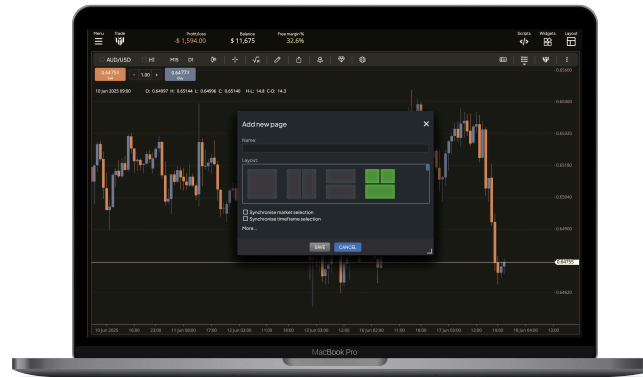

8 — ### Developer API
MyTrader's powerful API enables brokers and traders to develop directly into the platform to add any content or functionality they wish.

MacBook Pro

Flexible integration

Works as a front-end solution, ready to connect with any trading venue.

MyTrader can be integrated with any trading venue which has an API suitable for use in a web-based platform.

For example:

- REST/websocket APIs such as those offered by IG, OANDA, Forex.com, and FXCM
- Crypto exchanges
- MT4 and MT5 Server, using our MTIS

Auto Scripting

Traders can automate common actions.

The auto-scripting function enables traders to build their favourite strategies quickly and efficiently and to store them under individual icons for speedy execution without the need for the coding knowledge.
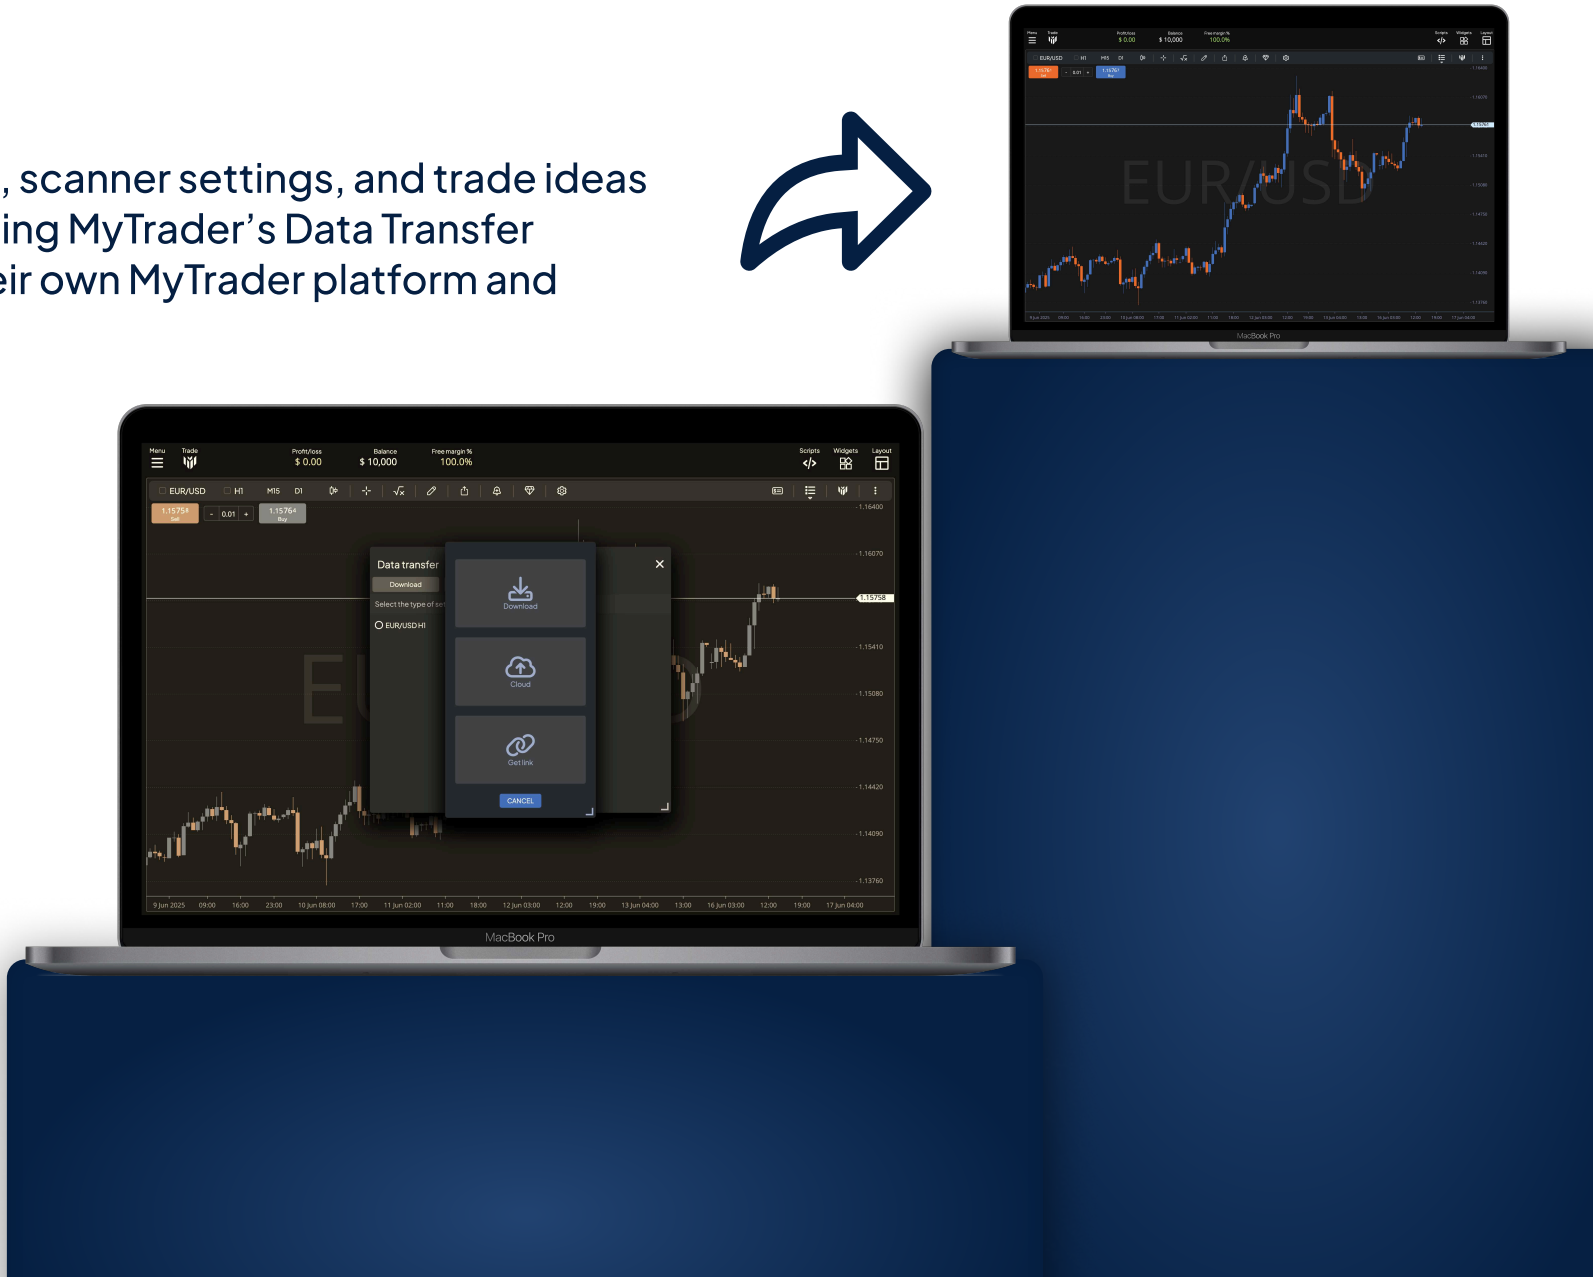

Social Sharing

Traders and analysts can share charts, scripts, scanner settings, and trade ideas via email, social media, or messaging apps using MyTrader's Data Transfer widget. Others can then upload them into their own MyTrader platform and interact with the shared settings.
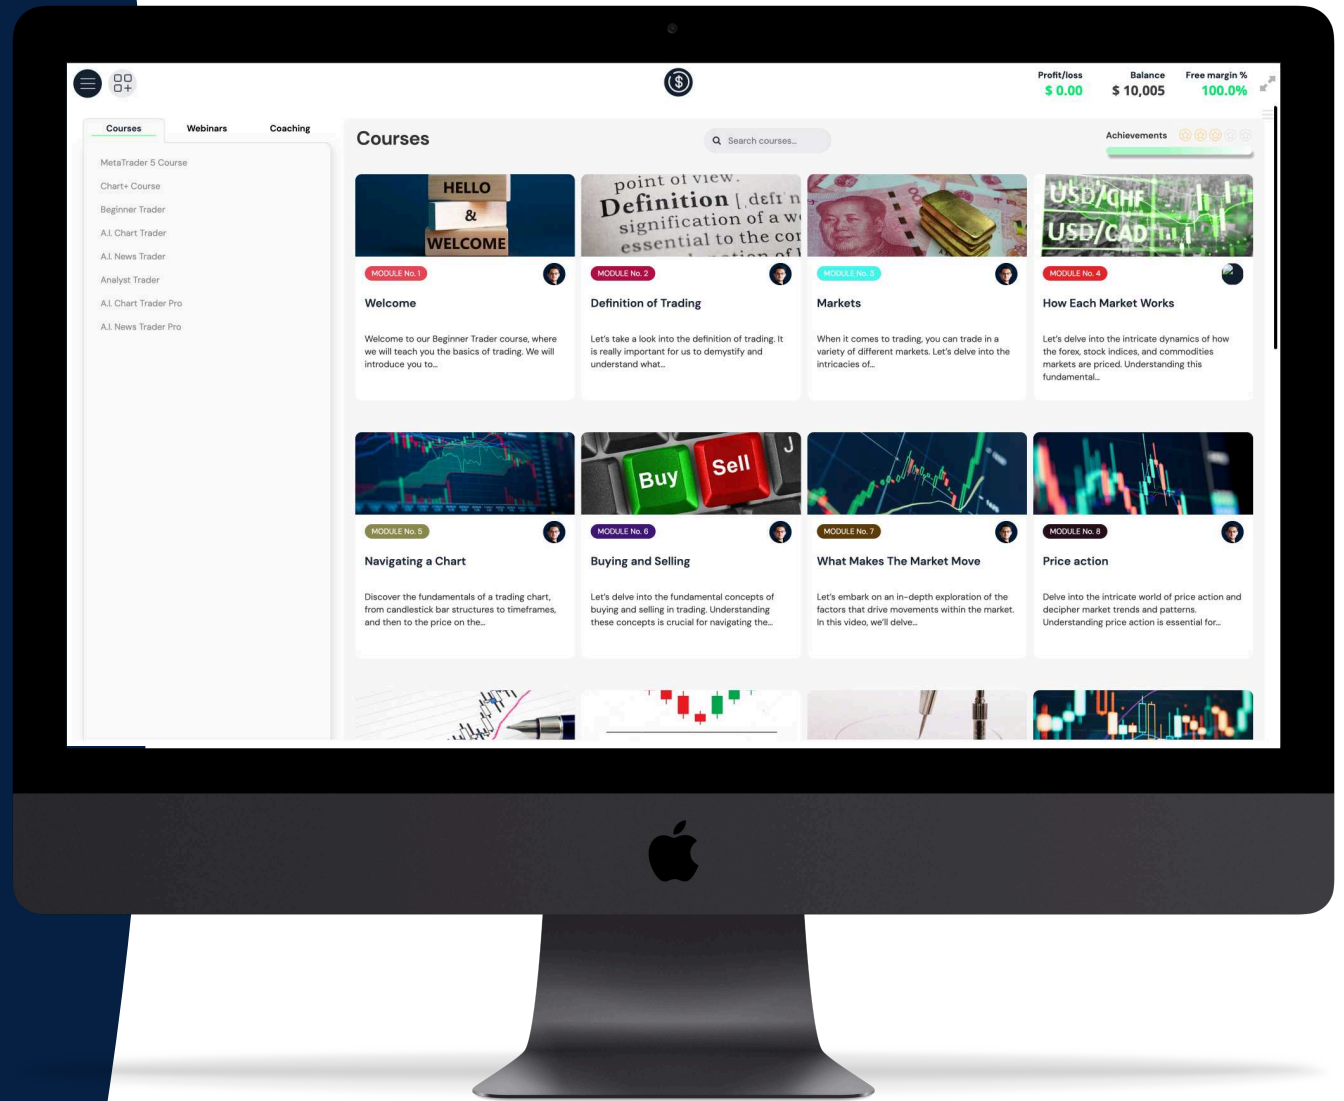

Supported content includes:
- Chart settings (full and mini)
- Market scanner settings
- Scripts
- Suggested trades
- Screenshots

Analysts can also post setups and ideas on websites, allowing clients to load them directly into MyTrader – far more engaging than static images or webinars.

Single Customer Journey

The broker can put customer sign-on, KYC, payments, education, webinars, copy-trading, trading insights, statements, third-party tools.

Developer API

MyTrader powerful API enables brokers and traders to develop directly into the platform to add any content or functionality they wish, includingthird-party applications such as Autochartist, Acuity, and Trading Central

The API is designed to recognise the need for web & mobile platforms to be intelligent, open and inclusive environments that are genuinely able to meet the needs of both brokers and traders.
